11:55 AM Jesse How was your weekend?

11:56 AM Ben I still have not a presentation for Thursday, but beyond that, good

01:41 PM Ben btw, Aglet seems to be what I'm setting this thing in hence, Aglet Mono

01:41 PM Jesse Ah, nice!

01:42 PM Ben I'm serious, it would be nice

But the thing is, I really don't see Aglet as a text face

03:53 PM Ben Who says you can't have a display mono
I'll talk you into it
No kerning

03:56 PM Jesse true
Sans first, then maybe Mono

03:57 PM Ben Ok, ok
I'll just make everyone tweet you asking for it

03:57 PM Jesse Anyway, thank you for the encouragement
Who knows, perhaps Aglet Mono will actually be our runaway hit

04:06 PM Ben Jesse, you could have this done by Friday
I don't think I'm even joking about that
Just figure out where to stop the weights
i.e., no Ultra and, then **no kerning** (you hate me now)

About Aglet Mono

Steady & offbeat

Round architecture informs Aglet Mono, tempering its rigorous, fixed-width rhythm. Clever strategies offset the lopsided spatial artifacts produced by a monospaced design: the dented sides of **A**, **V**, **W**, **v**, and **w** compensate for the absence of kerning. Extroverted **f**, **j**, **r**, and **t** fill their allotted space with curious hooks, and a brazen **g** supports the calculated weirdness of some of the other glyphs.

Aglet Mono includes a set of useful symbols and comes in fourteen styles, like its relatives Aglet Slab and Aglet Sans. Minimal Extra Light resembles a wireframe of the characters, and the vocabulary of shapes grows increasingly diverse as the weights approach the bulky embrace of Ultra.

A display face at heart, Aglet Mono also translates well to the more intimate, routine demands of code. Its atmosphere is distinctly industrial and technical, but also unstudied and ad hoc. Aglet Mono is a typeface for people who make stuff, whether headlines or software.
